MEMORIAL CLUB

101 BURKE STREET
AYR. QLD.

lunch will be served

RSVP 16 FEBRUARY
Jackie Berry 0411 601 862
or email: jberry@xrx.com.au

This solution utilises highly accurate GPS location Data to track vehicle activity on and off the Public Road Network. It automatically calculates off road travel, off road Idle and auxiliary fuel use to support high value fuel tax rebates for both heavy and light vehicles.

FTC Manager is the first and most comprehensive solution with an ATO Class Ruling for maximising FTC claims for both heavy and light vehicles on both a retrospective and ongoing basis.

The FTC law allows claimants to recover retrospective refunds for under-claimed FTC relating to fuel that they have already purchased over the last four years. Even businesses who believed they were claiming the maximum, or who have already undertaken a Fuel Tax Credit review are likely to be entitled to additional refunds due to the precision of Teletrac Navman's second-by-second GPS tracking technology.

Please be our guest at the Ayr launch with the innovators of the solution Peter Perich of PPM Tax and Legal and Jason Davis Transport Specialist who will explain how you can use FTC Manager to put some dollars back into your business!
