

Dear Members,

Burdekin Productivity Services are holding a field walk tomorrow morning, Tuesday, 18th September, at 11.00am at Chris Lyne's farm to have a look at the 'Stool Zippa' working. This implement has been designed to improve soil cover with applications of liquid Imidacloprid, and also has some potential benefits for improved fertiliser coverage and minimisation of losses. These were discussed at recent shed meetings, so growers can have a look at them working on a machine.

Meeting address on Old Home Hill Road heading towards the river.
