QSL Direct - 2019 Harvest Pool values

Growers using QSL Direct may have noticed an issue with the display of the Mandatory Harvest Pool and Undeclared Tonnes on their 2019 Season Tonnage Declaration. We are working to correct this issue as soon as possible and apologise for any inconvenience. The correct current Mandatory Harvest Pool volume can be determined by adding the displayed Undeclared Tonnes figure to the displayed Harvest Pool figure. The correct Undeclared Tonnes figure should be zero (0). A resolution is expected early next week.

Plane Creek Productivity Awards Monday May 27

QSL is proud to support the annual productivity awards in the Plane Creek region where our Grower Relationship Officer for the Plane Creek area Kathy Zanco will be presenting the QSL Award. Market Snapshot

The Jul19 sugar contract made its high on Friday last week at 12.75 c/lb and its low on Wednesday at 11.64 c/lb, closing the week at 11.72 c/lb. Small technical rallies provided some price volatility for short periods, however the lack of fundamental news meant these were unsustainable.
