Comments:

Showers in the latter part of the week impacted harvesting operations. As a result the weekly throughput was just over 280,000 tonnes, in a week that included scheduled stops at Invicta on A side and Pioneer Mill.

There are no scheduled stops planned for Burdekin factories this week. However, crews are using the weather-related downtime to do maintenance and checks at all mills.

The highest CCS sample for the week was 17.2 from a rake of Q183 plant cane, recorded in the Invicta area.

Members of the public are reminded to take care as they approach all cane rail crossings. Our cane trains operate 24 hours a day, seven days a week.

Please report any flashing light issues through the 1800 number displayed on the poles at our active crossings.
