Comments:

Wet weather had a major impact on harvesting operations last week. As a result, a reduced throughput of just under 145,000 tonnes was achieved by the four Burdekin mills.

There are no scheduled stops planned for Burdekin factories this week.

The highest CCS sample for the week was 17.1 from a rake of Q240 plant cane, recorded in the Invicta area.

We have just wrapped an incident-free school holiday period on our cane rail network, and we would like to thank everyone for their efforts in this regard.
