Dear Peter

- Repair work is progressing well at Pioneer Mill.
- We have pulled together a large team of skilled employees to work on the repair project, with people working around the clock.
- This includes electricians from Wilmar's other Burdekin sites as well as our Herbert and Proserpine mills.
- We have secured the majority of the equipment needed to repair the factory.
- The first major supply of conveyor gear will arrive on site today.
- The first of our major contractors will also arrive today.
- In the field sector, we are well progressed with moving Pioneer burnt cane to Kalamia and Invicta mills to be crushed.
- I will continue to keep you updated.

Best regards

PAUL TURNBULL

Burdekin Regional Operations Manager
