

QSL App - Now accepting pricing nominations

QSL Direct growers can now use the QSL App to submit their pricing nominations.

This new feature currently enables growers to nominate tonnes for the 2020-Season Early-Start Actively Managed Pool (which closes today), as well as the Target Price Contract and Individual Futures Contract grower-managed pricing options.

Come 1 March 2020, QSL's other 2020-Season QSL-managed pools will also be available for nominations via the app.

To access the new pricing nomination feature, just update your existing version of the app or download it for free from the [Apple](#) or [Google Play](#) stores.

The QSL App delivers the global sugar market to the palm of your hand, with user-friendly options that allow you to track global raw sugar and currency markets, manage your QSL sugar pricing (QSL-Direct growers only) and make common sugar and cane conversions while on the go.

For more details about the QSL App, or for assistance with making a pricing or marketing nomination, please see your local QSL representative.
