

Monday, 14 October 2019

We're on track with repairs to the bagasse conveyor system and associated electrical work at Pioneer Mill.

- Contractors have replaced two of the four fire-damaged conveyor belts.
- They are now working on the third belt and expect to start work on the fourth tomorrow (Tuesday).
- We have started commissioning electrical and instrumentation equipment.
- Movement of fresh Pioneer cane to our Kalamia, Invicta and Inkerman mills commenced on Friday.
- We're transferring about 7000 tonnes of Pioneer cane per day.
- These transfers will be reviewed once Pioneer Mill is back up and running.
- I will continue to keep you updated.

Best regards

PAUL TURNBULL

Burdekin Regional Operations Manager
