Comments:

The continued fine weather has provided good harvesting conditions and cane quality, resulting in strong throughput at all four Burdekin mills.

Total throughput of just less than 380,000 tonnes was achieved, with the one million tonnes crushed milestone passed late in the week.

The highest CCS sample was 16.5 from a rake of Q240 plant cane in the Invicta area.

Please take extra care when approaching cane railway crossings that are not protected by flashing lights, and continue to remind children about the dangers of playing near railway lines during the school holidays.
