ESTIMATES, EQUITIES & TRANSFERS

Most Groups for the Region who are slightly ahead and behind are due to the recent wet weather. Some concern raised by collectives with groups that are either below or above 2%.

HARVEST & TRANSPORT SAFETY

Incidents/near hits/derailments

- Inkerman - Brake Pusher hit rail – after pushing a break in the cane, the break pusher was driven out of the paddock where it hit the rail line breaking one rail & pushing out of place.
- Invicta – Sayers Rd siding 21/06/2020 – a loader took dirt from the siding and damaged rail.
- Inkerman – Haul out reversed into loco while shunting in siding.
- Invicta – spilling cane on the ground caused 5 bins to derail
- School holidays at the moment, lots of kids around the track, this is a major concern to us.

GENERAL BUSINESS

Burning under Power lines

A concern was raised from a contractor that Work Place Health and safety had approached them about not contacting power link when burning under power lines – Wilmar is waiting on an email to find out exactly what the WHS is seeking.

Grower Web/Harvest web concern

GrowerWeb concerns - Growers are not being able to access the Harvest Management report, John Tait explained the report has now been made available again to growers. Harvest Web is only available for harvesting contractors.

Les Elphinstone
Manager KCGO
