Weekly Wrap

Welcome to the NFF's **Weekly Wrap**, bringing you the week's farming and political news each Friday.

Headlines

730 story highlights agriculture's stance on emissions

On Wednesday night on the ABC's 730, NFF President Fiona Simson explained and [reaffirmed agriculture's](#) position in a reduced-emissions future. Watch it [here](#).

The time is now to for Australia's regionalisation

The [NFF will launch its Regionalisation Agenda](#) at the National Press Club on Tuesday. Supported by other leading business and industry voices, the paper sets down a plan for the investment and policy settings needed to get regionalisation right.

Facebook news ban impacts agriculture pages

Yesterday, [Facebook placed a ban on news related content](#) and pages in response to the Federal Government's proposed media code. Unfortunately, a number of agriculture's representative bodies were caught up in the dispute including [VFF](#) and [GrainGrowers](#). Be sure to visit the appropriate website to stay up to date with the latest news and information.

Stronger biosecurity laws passed in Parliament

The Federal Parliament this week passed new biosecurity legislation, [raising the maximum penalty for non-compliance with our biosecurity laws to \\$1.11 million](#).

Registrations open for NFF's 2021 National Conference

The NFF's [Sustaining the Nation](#) Conference is on 28-29 September 2021, in Canberra. A powerful and thought-provoking line-up of speakers will examine agriculture's role in sustaining communities, the economy and the environment.

Weekly insight

Bumper harvest season proves record breaking

The latest [winter harvest figures have been released by ABARES](#), estimating the 2020/21 national winter crop production to be the second largest harvest on record. The estimated crop production of 55.2 million tonnes came in 7.4 per cent higher than originally forecasted in the December 2020 crop report.

Table 1 Summer crop area and production, Australia, 2010–11 to 2020–21

Year	New South Wales		Queensland		Aus
	'000 ha	kt	'000 ha	kt	
2010–11	713	2,514	790	1,901	1,514
2011–12	757	3,064	783	2,379	1,556
2012–13	711	3,205	686	2,250	1,411
2013–14	568	2,317	559	1,469	1,139
2014–15	435	2,044	696	2,134	1,149
2015–16	412	1,646	624	1,814	1,054
2016–17	662	2,289	566	1,278	1,247
2017–18	614	2,205	648	1,648	1,283
2018–19	468	915	603	1,307	1,094
2019–20 s	101	344	239	461	356
2020–21 f	433	1,736	592	1,491	1,040
% change 2019–20 to 2020–21	330	404	148	224	192

Briefing

Water transparency needed

This week, the Productivity Commission released an issues paper on the Register of Foreign-owned Water Entitlements (the Register).

Outlining a range of issues related to the Register, the Productivity Commission has been tasked with examining the effectiveness of the Register, assessing its cost and benefits and putting forward recommendations in relation to the Register.

A vital part of Australia's agricultural landscape, the purpose of the Register is to increase transparency about foreign ownership of Australian water assets and, more broadly, maintain community confidence in Australia's foreign investment policy.

The PC will review the effectiveness of the current register including the timeliness and depth of information

Delays in communication and lack of transparency has undermined confidence in Australia's water assets, an already murky and complex issue. The key outcome is to ensure a correct understanding of who owns the water, this dispelling some often unhelpful assumptions.

The NFF has long called on Government to improve the transparency surrounding water ownership and recently recommended the Federal Government improve transparency surrounding water ownership in the [Get Australia Growing](#) recovery document.

Specifically, the NFF's recommendation was for Government to commit to the timely release of data regarding foreign ownership of Australian water assets.

The most recent data related to foreign ownership of Australian water assets is from 2019, meaning the data is already out of date and is misaligned with the very purpose of a Register.

The NFF is of the firm belief that full transparency of foreign investment regarding water assets is essential and that the Register must be transparent in how it captures the details of foreign investment.

Water is a critical, finite resource that needs to be prioritised in Government plans if agriculture is to reach its goal of being a \$100 billion industry by 2030.
