

## **DOES FORWARD PRICING PERFORM?**

We've analysed 10 seasons worth of data and the answer would appear to be yes.

Our updated Wilmar Growers' Forward Pricing Performance builds on research first published last year, and can be <a href="downloaded here">downloaded here</a>.

It shows that, on average, a GEI Sugar price of more than \$500/tonne was available 16% of the time. And a GEI Sugar price of more than \$450/tonne was available 44% of the time.

If you have any questions, please email us at <a href="mailto:info@au.wilmar-intl.com">info@au.wilmar-intl.com</a> and we'll be in touch.
