Comments:

Throughput for the Burdekin mills in week five was good with just over 370,000 tonnes of cane put through the rollers. This brings the season total to just over 1.65M tonnes.

This was a pleasing result given two factories lost time to unplanned stops. Kalamia Mill had unscheduled stops early in the week to replace a pan door, and replace a broken roller in the bagasse system. Inkerman Mill had an extended stop to repair some leaking boiler tubes. All factories crushed very well for the remainder of the week.

Average weekly CCS was 14.06. This was again well above budget thanks to the dry cool conditions.

The highest CCS sample was 16.9 from a rake of Q240 plant cane in the Invicta Mill area.
