CS Brazil rain:

Thai Rain:

NY Flat Price: NY#11 sugar market continued to consolidate early last week. On Friday the market made a 52 point breakthrough, due to another wave of frost warning in CS Brazil. NY Coffee market reacted more intensively to the frost news and was up 18% over the last week.

- NY Spread: Unlike the strong flat price performance, NY nearby spread remain relatively weak. Nearby October/March spread closed at 43 points carry, which is a drop of 6 points week on week.
- London Market: London white sugar market is also weaker than NY#11 raws market. Most active October contract drops from 460 USD/mt to 455 USD/mt, losing 5 USD/mt week on week. October/October white premium has further weakened to 57 USD/mt, which is the lowest level over the past year.
- **COT Report (20/07/2021):** Speculation community slightly increased their net long position from 193.5k lots to 198k lots. Index traders have liquidated 6k of net long position and increase 2k of net short position. Not much position change for commercial positions.

► CS Brazil experienced a 2nd wave of cold fronts over the weekend, with potentially another one to come at end of this month. We are currently foreseeing a possibility for CS Brazil to produce 510 million mt or less of cane this season, down from the 530 million mt previously expected. The effect of the drought and frosts on cane replanting will also affect the 22/23 sugar production.

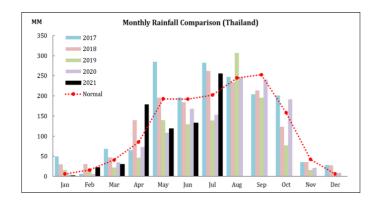

BEAR

► ISMA is expecting India to export 7 million mt of white sugar by end of September. India starts with 10.70 million mt opening stock in 20/21, with domestic sugar production expected to be 30.90 million mt. Estimated domestic sales of 26 million mt and exports of around 7 million mt sugar during current season.

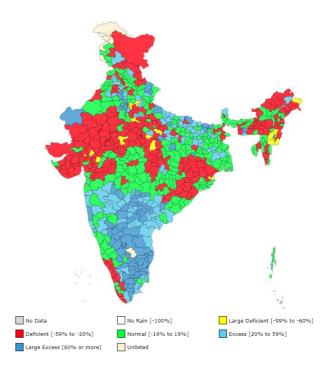

Thailand: Rainfall Update

- Rainfall in Thailand sugarcane area have been good during last week. 55 mm rainfall was being received.
- Unlike poor rainfall in May/June 21, Thailand rainfall in July 21 has been abundant.
- We expect Thailand sugarcane area to receive more than 250 mm rainfall in July 21, which is close to July 17 (282 mm) and July 18 (262 mm). Cumulative rainfall continues to be in line with the long term average volume.

India: Monsoon Update

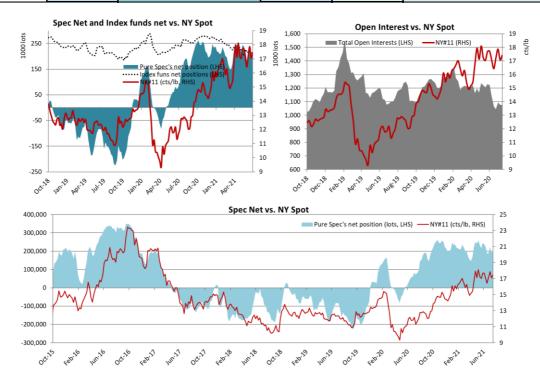

India's monsoon has in general been positive for sugarcane growing areas. In the major sugarcane areas of Maharashtra and Karnataka, cumulative rainfall has been between 10-20% more than normal vs historical average. When combined with the sugarcane area expansion in Maharashtra, it is quite optimistic at current stage for 21/22 Indian domestic sugar production outlook.
