BULL

➤ CS Brazil experienced 3rd wave of cold fronts at end of July. We are currently foreseeing a <u>high possibility</u> for CS Brazil to produce 490-500 million mt cane this season. The effect of prolonged drought and frosts on cane will largely impact sugarcane replanting and CS Brazil 22/23 production outlook.

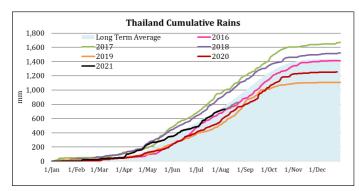

BEAR

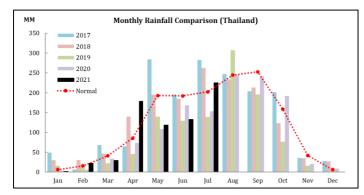

► Thailand Sugar Mill Association (TSMC) is currently forecasting 2021/22 cane output at 90 million mt as the higher cane price is encouraging farmers to plant more cane and to invest in field maintenance.
