

Pesticides – right place, time and amount

Before use, read the label and consider the legislation

Always check:

directions for use

- ✓ can the product be used for the intended crop
- ✓ rate per hectare, rate limit, application methods
- ✓ number of applications and total rate per year
- ✓ droplet size, nozzle selection and banding requirements
- ✓ water rate and quality
- ✓ withholding periods
- ✓ slope within blocks
- ✓ timing statements and seasonal spray windows

weather conditions

- ✓ to be recorded at site of application
- ✓ label wind speed requirements
- ✓ spray drift considerations – inversions and Delta T indicators
- ✓ rainfall forecast

buffer requirements

- ✓ downwind to aquatic and terrestrial systems
- ✓ proximity to water bodies

record keeping content and timing

- ✓ label records
- ✓ legislative records
- ✓ environmentally relevant activity standards
