

**Tuesday, 17 May 2022**

- We have consulted harvesting groups and grower representatives to discuss the impact of wet ground conditions on the start of crushing.
- It was agreed that the planned start date of 7 June be delayed by one week.
- We now plan to start the season on Tuesday 14 June.
- We will review the start date weekly, in consultation with harvesting operators and grower representatives.
- We will keep you updated.

Best regards

**JOHN TAIT**
