1. REMINDER** - KCGO MEMBER DISCOUNTED HEALTH INSURANCE OFFER

Corporate Health Insurance

Working together with Kalamia Cane Growers, we are excited to offer you a healthy corporate discount on your health insurance under the Kalamia Cane Growers Corporate Health Plan. Experience the Queensland Country difference with:

- ✓ **Healthy savings**
A 6% discount* on your annual policy premium.
- ✓ **A dedicated Corporate Partnership Manager**
Kim Anderson, your dedicated Corporate Partnership Manager will be happy to help you with any questions you may have.
- ✓ **Easy to understand products**
Our products are easy to understand and provide our Members with great value for money and peace of mind.
- ✓ **Excellent service**
We're here to help. Our commitment to helping our Members is second to none with fast and friendly service both face to face or over the phone.
- ✓ **National Coverage**
We provide coverage anywhere in Australia, giving you peace of mind wherever you work, live or play.
- ✓ **95% Member satisfaction rating^**
- ✓ **Generous benefits**
Our benefits help promote a healthy lifestyle and based on direct Member feedback, are regularly reviewed to ensure they remain competitive.
- ✓ **Easy claiming**
Claim easily anywhere, anytime through our Mobile App by simply uploading a photo of your receipt or via our Online Member Services portal.

If you have any questions or for more information contact your dedicated Corporate Partnership Manager, Kim today!

**Queensland
Country
Health Fund**

* The corporate discount is provided under the Kalamia Cane Growers Corporate Health Plan and is applied to the gross premiums at the chosen level of cover.
**Source: January 2021 Member Satisfaction Survey, 63% were very satisfied and 32% were somewhat satisfied from 1,494 respondents.

Already a Member with Queensland Country?

Great news if you're already a Member you'll now be eligible to receive a **corporate discount*** on your premium! To receive this discount simply complete the Apply Discount Form on your health insurance portal. Once you have submitted the request form, we will confirm via email or post that the discount has been applied.

ALSO, don't forget to **refer a friend, family member, colleague or work mate** to Queensland Country and if they take out an eligible singles policy during the promotional period you'll receive a \$100 Visa Gift Card*. And we'll double it for couples or family policies!

Make sure you tell your friend when joining to provide us with your name and contact details, so we can send you your gift card.

There is no gift card limit, so tell as many friends as you like!!

2. KCGO Member Notice – BPS Director Election – Dave Paine – Posted – 3/6/22

KCGO Member Notice

Our KCGO Manager, Dave Paine has nominated as a BPS Director in the upcoming election.

Dave comes with a wealth of experience and is very passionate about the agricultural industry, in the past, present, and for future generations. Farming, planting & harvesting for forty years, and with fifteen years employment at Burdekin Productivity Services as a Field officer, and later as a Senior Field officer, Dave would be a great asset and be immensely beneficial to have as a BPS Director.

We ask KCGO members, when voting in this election, please consider Dave.

On behalf of the KCGO Collective, we wish him all the very best and hope to see him as one of the new directors of Burdekin Productivity Services.

Dave Paine & grandson Ryan Ziliotto.

3. QLD Government Media Release – Disaster Assistance - Posted – 1/6/22

Media release

**Minister for Police and Corrective Services and Minister
for Fire and Emergency Services**

The Honourable Mark Ryan

DISASTER ASSISTANCE FOR PRIMARY PRODUCERS FOLLOWING NORTHERN AND CENTRAL-WESTERN QUEENSLAND FLOODS

Disaster assistance is available to primary producers in Barcaldine, Longreach and Winton after intense rainfall and flooding swept through Northern and Central-Western Queensland during April and May.

The assistance is made available through the joint Commonwealth-State Disaster Recovery Funding Arrangements (DRFA) and will give primary producers in those areas access to freight subsidies of up to \$5,000 and low-interest loans of up to \$250,000.

This assistance will provide a helping hand to those who have been affected by the event between 21 April and 12 May 2022.

Croydon Shire Council has also been added to the list of councils activated for counter disaster operations, which will help with the costs of the clean-up and recovery.

Heavy rain fell across multiple days throughout Northern and Central-Western Queensland, which left widespread damage.

Minister for Fire and Emergency Services Mark Ryan said 20 Local Government Areas have been activated for DRFA assistance in response to the Northern and Central-Western Queensland rainfall and flooding event.

“Everyone who is affected by these serious weather events should have access to the financial support they need to recover,” Minister Ryan said.

“It’s been an unusually long disaster season, with extreme rainfall landing heavily on our state, well into what would normally be Queensland’s dry season.

“Nine natural disasters have unleashed their fury in just the span of a few months which has resulted in numerous activations of DRFA assistance along with never seen before extraordinary disaster packages.

“All the available support requested will continue to be provided, as many areas are left licking their wounds after these most recent onslaughts of disasters which have been bestowed on us.”

In response to the Northern and Central-Western Queensland rainfall and flooding event from 21 April – 12 May, DRFA assistance has been activated for Barcaldine Regional Council, Barcoo Regional Council, Blackall-Tambo Regional Council, Boulia Shire Council, Burdekin Shire Council, Carpentaria Shire Council, Charters Towers, Cloncurry Shire Council, Cook Shire Council, Croydon Shire Council, Douglas Shire Council, Flinders Shire Council, Hope Vale Aboriginal Shire Council, Longreach Regional Council, McKinlay Shire Council, Mornington Shire Council, Palm Island Aboriginal Shire Council, Richmond Shire Council, Winton Shire Council and Whitsunday Regional Council.

Information on disaster assistance can be found on the Queensland Reconstruction Authority’s website at www.qra.qld.gov.au

Minister Ryan’s Office: Ph: (07) 3035 8300

4. KCGO AGM Acknowledgement – Posted 3/6/22

KCGO ANNUAL GENERAL MEETING

KCGO Directors and Staff would like to thank our valued members for attending the AGM at the Burdekin PCYC on Thursday, 2nd June 2022.

Our special guests were:

Sam Bastounas – Chief Executive Officer (Pacific Biotechnologies (Australia) Pty Ltd

Nicolas Neveux – Technology Lead (Pacific Biotechnologies (Australia) Pty Ltd

Gregg Supple – Commercial Lead (Pacific Biotechnologies (Australia) Pty Ltd

Sam and Nicolas spoke about Regan Aqua and the production of Plant Juice – shown below.

The full presentation is available at the KCGO office.

We sincerely thank these gentlemen for taking the time and to share their extensive knowledge with our members.

The meeting was successful with a full discussion about future plans moving forward and crush season issues.

RegenAqua process operates as a circular solution returning vital nutrients back into agriculture

- Green algae harvested from the bioremediation process is converted into a powerful biostimulant called PlantJuice
- Returning vital N + P nutrients back to agriculture
- Reducing the reliance on traditional fertilisers
- Assisting with root assay and early shoot growth reducing continued and excessive nutrient run off
- Improves soil quality and protects crops against stresses including heat, drought and herbicide applications
- Sustainable and consistent supply with zero impact to ocean kelp forests where traditional kelp biostimulants are derived

5. QSL Information Brief – Posted – 6/6/22

- **Advance Rate Increase** - The QSL 2021-Season Advance Payment rate for this month has been increased to **97.5%**. This payment will be made in the week commencing 15 June 2022, with the final payment for the 2021 Season to be made next month. The initial 2022-Season Advance payment rate has been set at 65%, with this currently scheduled to increase to 70% in October 2022.
- **QSL Board Change** - QSL Non-Executive Director Craig Doyle will step down from the QSL Board on 17 June 2022. His resignation is a requirement of his new role as the Chief Executive Officer of the Northern Australia Infrastructure Facility.
Mr Doyle joined the QSL Board on 11 October 2016 and is currently Chair of QSL's Operations Committee and People and Remuneration Committee, as well as a member of the Audit and Risk Committee. QSL Chairman Guy Cowan said Mr Doyle had provided invaluable support and advice to the QSL Board during a time of challenge and change for the business. "His industry insights, operational experience and energy will be sorely missed and we wish him the very best for the future."
Recruitment for Mr Doyle's replacement is currently underway, with the QSL Board Selection Committee expected to finalise this process in coming weeks.
- **Third Party Payments** - QSL Direct growers are reminded that any Third-Party Payments (liens) in place for the 2021 Season will automatically roll into the 2022 Season.
If you do not wish your Third-Party Payment/s to continue into the 2022 Season, please contact QSL as soon as possible.
If you have any questions regarding Third-Party Payments, please contact your local QSL Grower Services Team or call the QSL Direct helpline on 1800 870 756.

Key Dates

- **20 June: 2022 Target Price Contract Roll.** Last day to achieve 2022-Season Target Price Contract orders before your pricing window is automatically extended and roll adjustments apply.
- **20 June: July 2022 ICE 11 Contract Pricing Completion Date.** Last day to achieve or roll pricing allocated to the July 2022 ICE 11 contract.
- **30 June:** Last day to qualify for the **2021-Season Loyalty Bonus.**

If members have any questions in regards to the above, please don't hesitate to get in contact with:

- Russell Campbell - Grower Relationship Manager – 0408 248 385
- Kristen Paterson - Grower Relationship Officer– 0438 470 235
- Rebecca Love – Grower Relationship Officer – 0429 054 330 (Mon- Thurs)

Rebecca Love

Grower Relationship Officer - Burdekin

Mobile 0429 054 330

Lower Burdekin Ratepayers

BY EMAIL

Dear Ratepayers

WARREN’S GULLY SYSTEM CAPACITY UPGRADE

We write to provide you with an update on the Warrens Gully System Capacity Upgrade Project (“**the Project**”).

The analysis and planning phases for the Project have been ongoing for approximately eight years and LBW is pleased to advise that works are now commencing on this long-awaited capacity upgrade of its infrastructure in the Southern Division.

Warren’s Gully System – Historical need

The existing Warrens Gully pump station has been in service since its construction in 1966 and major components of the existing pump station have reached or are approaching the end of their useful life. In 2009, the then South Burdekin Water Board (“**SBWB**”) due to an inability to meet peak irrigation demands, commissioned professional engineers to review the capacity constraints within its entire system and provide recommendations to address the issue. SBWB continued to investigate options for increasing supply to existing ratepayers until 2015 when the Boards amalgamated. Following amalgamation LBW continued to investigate methods of improving capacity in the Southern Division.

The outcome of the review, further capacity studies and option analysis carried out by LBW in conjunction with professional engineers provided guidance on the most appropriate infrastructure upgrades within the Southern Division. As a result of the review and studies, SBWB and LBW both determined to upgrade the Southern Division systems in two stages. In 2014, the first stage, being the doubling of the capacity of the Down River pump station, was completed.

The Project is the second phase and is to be carried out in two parts, it will address the existing system capacity constraints of the Southern Division and provide for immediate and future expansion of the serviced area if an increase in demand requires it.

The Project

Part 1 of the Project involves the design, construction and commissioning of a new two cell pump station, and the replacement of existing culverts and the inverted siphon with larger units. A new pump with a 140 ML per day capacity will be fitted to one of the cells in the new pump station. The new pump station will be located adjacent to the existing Warrens Gully pump station and will become the new base load pump station for the Warrens Gully system. The capacity of the existing Warrens Gully pump station is 140 ML per day and will be operated in tandem with the new pump station during the peak irrigations demand periods, giving a maximum capacity of 280ML per day in that system once Part 1 of the Project has been completed.

Completion of Part 1 will immediately increase LBW's peak river pumping capacity within the Southern Division from 450ML per day to 590 ML per day and provide an ability to further increase to an ultimate capacity of 690 ML per day in the future.

Part 2 of the Project will be carried out if and when required and will consist of the purchase and installation of a new pump into the second cell of the new pump station plus the replacement of the existing pumping units of the original pump station. This will enable the life of the existing pump station to be extended into the future.

While the new pump station will be constructed adjacent to the existing Warrens Gully pump station, the additional capacity will benefit all three major systems within the Southern Division.

Currently, LBW diverts 70 ML per day from the Central system across to Warrens Gully system during peak periods of irrigation to meet demand in that system. LBW also reduces or halts aquifer recharge activities during peak irrigation periods due to capacity constraints. Once the new pump station is completed, the rerouting of water from the Central system across to Warrens Gully will cease. This will improve the water service delivery to the Central and Down River systems. LBW will also have the ability to continue its aquifer recharge activities during peak irrigation periods which will improve the reliability of groundwater within the Southern division in its entirety.

Improvement in ability to meet demand and the apportionment of headworks charges

The increased river pumping capacity will allow LBW to better meet the water demands of existing ratepayers, who are routinely subject to rostering and restriction during peak irrigation demand periods. This means better service delivery to existing ratepayers. The increased capacity will also allow LBW to continue its aquifer recharge services during peak irrigation demand periods, improving services and protecting the aquifer's condition. Accordingly, headworks charges will be applied to all existing Southern Division ratepayers on a proportional basis based on the additional water supply provided by the Project. These charges will be incorporated into Southern Divisions rates and charges.

The additional pumping capacity will benefit existing irrigated agricultural land outside the authority area with improved frequency in supply and also allow expansion in irrigated agriculture adjacent to and within the

Southern Division of LBW's authority area. The capital and financing costs associated with the water supplied by the Project will be proportionately factored into water charges levied upon:

- (a) customers and ratepayers within the authority area bringing new irrigated agricultural land or other into production;
- (b) customers outside the authority area utilising water supplied by the Project.

The headworks charges have been calculated on a cost recovery basis to recover LBW's capital contribution and financing costs for the Project. Once the capital and financing costs for this Project have been repaid the headworks charge component of the rates and charges will be removed.

Pursuant to s569 (3) of the Water Act 2000 (Qld) LBW is required to ensure that water activities carried out outside of its authority area do not:

- (a) limit the authority's ability to perform its main function; or
- (b) financially prejudice the authority or its ratepayers or customers.

LBW will ensure it complies with its obligations.

LBW has analysed its historic water use data and sufficiency of its water allocations. The expected increase in water use arising from the increase in capacity to supply has been added to the existing water usage data. Based on this analysis LBW does not believe it will need to purchase additional permanent water allocation as it is not required regularly enough to justify the capital expenditure and instead will rely on the temporary water market to maintain the existing level of supply. LBW has calculated appropriate charges which are factored into the water pricing structure for non-ratepaying customers so as to accumulate sufficient funds to source additional water allocations if and when required. LBW will continue to monitor its usage, water allocations and future projects such as the Raising of the Burdekin Falls Dam which will generate additional water allocations.

LBW will continue to keep you informed of the progress of the Project during its construction. If you have any specific questions regarding the Project, we encourage you to contact LBW.

Yours sincerely

David Sartori
Executive Officer
Lower Burdekin Water

HERE'S 10 THINGS TO KNOW.

FROM  QUEENSLAND FARMERS' FEDERATION

1.

Nominations for the 2022 Reef Champion Awards [open today](#). The Awards are a celebration of the outstanding achievements of individuals and organisations working to improve the quality of water entering the iconic Great Barrier Reef. The Awards recognise the dedicated land managers, Traditional Owners, extension officers, industries and members of the community excelling in their efforts to help safeguard the future of the Reef. More information and the sponsorship prospectus [HERE](#).

2.

Having lived in suburban Brisbane most of her life, Molly Blake never imagined herself traversing through banana paddocks as part of her daily work. Now she can't imagine spending her days any other way. For the past year, Molly has been working as a Graduate Extension Officer for the Australian Banana Growers' Council based in South Johnstone, around 1 hour south of Cairns, through QFF's Agricultural Extension Work Placement Program. Read Molly's story [HERE](#).

3.

AgriFutures Australia is working with RMCG to support the Pre-Farm Gate Waste [Program](#), which is collaborating with Australia's primary industries to better understand and identify the options to improve their waste management. A survey has been developed to capture waste volumes and practices to increase the knowledge of cross-sectoral waste issues for agriculture, fisheries and forestry. The survey closes 13 June. Find it [HERE](#).

4.

The Developing Northern Australia Conference on 6 to 8 July in Mackay offers attendees the opportunity to discuss the challenges and opportunities for next-generation agriculture and water, and reflect upon progress being made. It has a major influence on policy and program development, investment attraction and problem solving. Join change-makers advancing Australia's north and register [HERE](#).

5.

QFF is seeking to appoint a program manager with experience in banking, insurance or the financial sector. The successful candidate will display an understanding of farm enterprises and agricultural crop yield concepts. They will lead a new innovative crop insurance project and oversee the delivery of additional insurance-related projects within the QFF project portfolio. See the job advertisement for the Risk and Insurance Program Manager, Agriculture [HERE](#).

6.

Digital technologies are rapidly changing the way we work, learn and live - yet in agriculture, digital capability is generally still lagging. The AFI is undertaking research to assess Australian agriculture's digital capability, which will help target investment where it's most needed to build capacity for a future-fit farm sector. The survey which can be found [HERE](#), only takes 5 minutes, and will not only

provide anonymised data to paint a picture for the research, but also help you identify your own digital strengths and opportunities for skills development.

7.

The Fruit and Vegetable Consortium, Nutrition Australia, and AUSVEG are undertaking a research project amongst Australian vegetable growers to better understand the industry perceptions and views towards increasing consumption of vegetables, as a national priority as we recover from the COVID-19 pandemic. Australian vegetable growers are invited to participate in a short online survey. Your views are important as suppliers and growers of fresh produce. More information [HERE](#).

8.

Step-by-step guides, practical advice and videos are now available on the [Business Queensland](#) website for business owners and operators to work through at their own pace to develop tailored plans and introduce strategies to help their business thrive. There are updates across a number of topics, including Finance, Accounting and profit, Adapting to change and Digital skills for business. See information [HERE](#)

9.

The Supporting Landholder Capacity [Survey](#) is a three-year project aimed at supporting landholder capacity for quality agriculture development across the Top End of Australia. The firsthand experiences of growers in applying for land, water and environmental approvals in the North are sought. The responses provided in this survey will help to identify the major obstacles to agricultural development in the north. More information [HERE](#).

10.

QFF, with funding from the Department of Justice and Attorney-General, has developed 'Walking the Wire', an e-kit to help strengthen the financial security of rural agribusiness women. It aims to provide guidance to help farming women take the next step in securing their financial future, particularly where they may have had difficulty prioritising their own financial security in the past. See the e-kit [HERE](#)

8. Wilmar Burdekin Grower Update – Crushing Start Date – Posted – 7/6/22

[View this email in your browser](#)

Tuesday, 7 June 2022

- Our logistics officers have been speaking with Burdekin growers and harvesting contractors this morning to understand the impact of overnight rain on the planned season start date.
- Invicta and Inkerman mills are still on track to start the season next Tuesday (14 June) as rainfall totals were not significant.
- Growers in the Pioneer Mill cane supply area reported falls of between 30mm and 60mm, while Kalamia Mill suppliers reported rainfall totals of 20mm to 45mm.
- Due to these significant rainfall totals, Pioneer and Kalamia mills are unlikely to start up on Tuesday.
- Our logistics officers will contact growers and contractors in these mill areas again on Thursday to review ground conditions.
- We will keep you updated.

Best regards

JOHN TAIT

Burdekin Cane Supply Manager

April/May 2022

BBIFMAC

Managing Natural Resources to ensure Social Wellbeing, Primary Production and Ecological Sustainability.

'Grain and Graze' Dual Purpose Peanut Trial in Home Hill

In late May, it was all systems go with the 'Grain and Graze' Peanut Trial in Home Hill. The project led by Central Queensland University (CQU), with funding from the CRC for Northern Australia (CRCNA) is assessing dual purpose peanuts for kernel yield in combination with different fodder production options.

Mackenzie assisted Kacie Buchanan, Agronomist from the Peanut Company of Australia (A Bega Company), with maturity testing on the peanut crop to determine the right time for harvest.

A sample of peanut plants were dug up from the field, and the nuts were removed from the biomass.

The peanuts were brought back to the BBIFMAC office where the dirt and outer shell was taken off with a pressure washer.

The peanuts were then colour sorted into black, brown, orange, yellow and white categories. Black and brown are the most mature, and white is the least mature. The proportion of mature peanuts gives an indication of when to harvest.

The process of maturity testing included digging up samples of the crop from the field, removing the peanuts from the biomass, bringing the peanuts back to the office to pressure wash them and colour sort them to determine the proportion of mature peanuts.

Analysis of the peanuts determined that they were ready for harvest the following week. Mackenzie then assisted Surya Bhattarai, who travelled from Central Queensland University (CQU) in Rockhampton, with conducting the final measurements before harvest of the peanut crop in Home Hill.

The trial consisted of three different varieties of peanut (Kairi, Holt and Alloway), randomised in thirty plots. For the duration of the trial, data was collected from a two metre length within each of the thirty plots. The data collection included soil moisture, chlorophyll content of the leaves, average plant height, dry biomass weight, and percentage of canopy cover.

The aim of the project is to determine if the peanut biomass can be harvested during the mid-stages of crop growth and used for livestock fodder, without adversely impacting the peanut yield.

We look forward to updating you on the results when they are made available in the coming months.

The peanuts were dug up and will remain upturned for a week to dry out before a thresher comes through to separate the peanuts from the biomass.

Fine Scale Water Quality Monitoring Project Update

The installation of fine scale water quality monitoring sites has been ongoing since the end of 2020 in both the Lower Burdekin and Lower Herbert regions. The project is led by the Queensland Government's Water Quality Investigations team (WQI), and delivered in partnership with BBIFMAC.

In May, the WQI team visited the Burdekin region to install two new sites, an upstream reference site at the Burdekin River near Dalbeg Pump Station, and a downstream impact site at Lilliesmere Lagoon.

Additionally, four of the Burdekin Bluespot sites in the Barratta Creek system (part of a project that was completed in 2021), have been converted to real-time monitoring sites as part of the fine scale project.

These sites are located at Stockham road, Viv Cox Bridge, Allen road, and East Barratta Creek on the Bruce Highway.

The micro sites are recording nitrate-nitrogen (in mg/L) and stream level (in metres) which is uploaded to the CSIRO 1622™ portal. This information is available for public viewing.

To access the data, visit: <https://wq.1622.farm/>

Manual samples are taken by BBIFMAC staff at each sites on a monthly basis to verify the readings from the real-time sensors.

Meet the BBIFMAC Committee

Lisa Parker is the newest member of the BBIFMAC Management Committee, having been elected by the members at the AGM this year.

Lisa is the manager of Burdekin Cane & Agriculture Organisation Limited (formerly Pioneer Cane Growers Organisation Limited) and is a Director on the Lower Burdekin Water Board.

Previously Lisa worked as a litigation solicitor in Ayr, Townsville and in Newcastle, New South Wales. Lisa and her husband Ross (a fourth generation Burdekin cane farmer) purchased their farm and relocated their family to Ayr in 2017. Lisa is also a graduate member of the Australian Institute of Company Directors.
