

Friday, 29 July 2022

- We have just resumed crushing operations at Pioneer Mill following a series of unrelated stoppages over the last 24 hours.
- Since 11.30am yesterday, we have lost crushing time due to four separate issues.
 - Slat conveyor repairs and adjustments
 - No.5 mill motor drive control card replacement
 - Bin derailment and secondary damage at the uncoupler
 - Damaged rake due to choke at No.4 intermediate carrier
- Today's loading has been reduced as a result of these stoppages.
- We expect to resume normal loadings tomorrow.

Best regards

PAUL TURNBULL

Burdekin Regional Operations Manager
