### Comments:

There was good throughput for week seven of the season with just under 390,000 tonnes of cane crushed in the Burdekin. This brings the total for the year to just under 1.4M tonnes.

The weekly crush was above budget at Inkerman, Kalamia and Invicta. Pioneer experienced some mechanical issues around the feeding station and milling train, which are now resolved.

The average weekly CCS was 13.24, which is well below budget. The highest CCS sample was 16.5 from a rake of Q183-2R in the Mulgrave productivity zone (Invicta).

With harvesting and crushing operations now back in full swing, locals and visitors are reminded to take care around our cane rail network.

Please use your train brain and always give way to cane trains.
