**Comments:**

The Burdekin mills processed just over 355,000 tonnes of cane this week.

Kalamia and Pioneer mills both exceeded budget this week. Inkerman and Invicta mills came in under budget due to cleaning intermissions and unplanned stops.

Following an estimate review, the forecast crop has been revised down by 100,000 tonnes to 8.1M tonnes

The season-to-date total for the Burdekin mills is now slightly more than 5.86M tonnes, which represents about 72% of the total forecast crop.

The average weekly CCS increased by 0.44 units and remains above budget.

The highest CCS sample of 18.2 was from a rake of Q240-4R harvested in the Shirbourne Productivity Area.

Please remember to use your train brain and always give way to cane trains. A fully loaded cane train can take up to one kilometre to stop.
