

Friday, 6 October 2023

This is a short note to keep everyone informed about the current state of cane supply to the four Burdekin mills.

- Every year, my team endeavours to facilitate a smooth end of harvesting and processing activities while taking into account fluctuating crop estimates, milling performance, harvesting capacity, loco/siding availability and bin delivery/pick-up schedules.
- We are planning to facilitate processing some 'Pioneer Mill cane' at Invicta. This, along with the NDL road transport cane, will place pressure on bin delivery/pick-up times in some areas of the Invicta rail network.
- To ease the pressure, Kalamia and Inkerman mills will process the current NDL Road Transport cane.
- As always, we will continue to monitor milling performance, crop estimates, supply balance and loco schedules to achieve a satisfactory outcome for the Burdekin region.
- For more detailed information, please contact your logistics officer.

Best regards

JOHN TAIT

Burdekin Cane Supply Manager
