You're invited to a demonstration of the Robotti, a multipurpose autonomous farm vehicle which will be operating in a sugarcane field at SRA Burdekin on 17 January.

The Robotti from Denmark has been imported by Bundaberg company, Farm Concepts, and is designed for precision operations such as seeding, weeding and spraying. The machine can operate 24/7 without a driver, solely guided by GPS and cameras.

Farm Concepts Director Braden Hellmuth will demonstrate the vehicle and the capabilities of both hardware and software.

Could it be a fit in your farming operation? Come along and find out.

There will also be a demonstration of a dual tank spot sprayer from Autoweed.
