

ADVANCED WORKSHOP ON KNOCKDOWN HERBICIDES

You're invited to our workshop to learn how to optimise your use of knockdown herbicides. SRA's Weed Scientist, Emilie Fillols, together with representatives from Nufarm, Malcolm Salisbury and Reannan Schultz, and Croplands, Rob Graham, will provide information on effective post emergent weed management in sugarcane.

The workshop is designed for growers and advisers who are familiar with knockdown herbicides and spray applications and want to take their knowledge further.

Participants will learn:

- How knockdown herbicides enter the leaves, reach their target site and kill the weeds
- How to choose the correct adjuvant
- How to prevent spray drift.

The workshop includes on-site demonstrations from Nufarm and Croplands to illustrate product incompatibility and the effect of nozzle and adjuvant on drift.

**** Please bring a sample of your spray water for analysis of pH and hardness. ****

BURDEKIN

When: Tuesday 26 March, 8 am - 2 pm

Where: PCYC, 164 Macmillan Street, Ayr

Contact: Terry Granshaw, District Manager Burdekin

M: 0457 650 181 or **E:** tgranshaw@sugarresearch.com.au

INGHAM

When: Wednesday, 27 March, 8 am - 2 pm

Where: SRA Ingham, 181 Fairford Road, Ingham

Contact: Phil Patane, District Manager Northern

M: 0431 818 482 or **E:** ppatane@sugarresearch.com.au

RSVP by Wednesday 20 March for catering purposes
