# AGLANTIS

SIMPLIFYING SMART FARMING

## *Simplifying* Smart Farming

An Australian-owned smart farming company based in the Burdekin – working with farmers across Queensland to provide innovative, practical and reliable solutions, empowering you with knowledge and a reliable service.

Reliability is a core value, which we achieve by ensuring you have easy access to local on-ground support and specialist advice from our leading smart farming experts.

## Making GPS Work for You

We help make record-keeping easy, by setting up your GPS to record operations while they are being performed. Not only does this provide you with accurate records to assist with meeting regulatory compliance, but it also sets a solid foundation for progression in and development of precision farming.
