

[Training Calendar](#)[Training Rates](#)[Contact Us](#)

Hi, on 1 August 2024, we are holding a chemical safety course in Ayr. The course provides certification for buying, supervising and applying Ag & Vet chemicals.

Chemical Safety Training: Ayr, 1 August 2024

[Register for Training Course](#)

P.S. Please ignore if you and all of your staff have recently completed, or are enrolled for a course.

About the course

The certification includes hands on training and assessment tailored to your industry so that it is as familiar, and useful as possible. During this course you or your staff will (among other things): learn how to use chemicals safely, consider and improve the effectiveness of your spraying, and receive updates on resistance management strategies.

A new training team

Our new trainers Rob and Tamara gained their experience through a combined 45 years in agriculture on the Darling Downs.

Hands on learning

We know that you don't work in a classroom environment, you need the right information for what is new in your industry, that you can use straight away.

Testimonials

Rodney W

"Great information and easy to listen to instructor who was able to impart his knowledge to me easily. Very good course. I learnt a lot."

Louise D.

"Usually chemical courses are like watching paint dry and I struggle to not fall asleep. This time I actually retained the info."
