Comments:

The Burdekin mills processed just under 365,000 tonnes of cane for the week, which was just below budget. It was however the best weekly throughput for the season to date, bringing the total tonnes crushed to more than 1.8M tonnes.

This represents just over 21% of the Burdekin region's forecast crop.

Production was impacted this week by a number of unplanned stops as well as industrial action. The opportunity was taken during the stoppages to carry out necessary maintenance work.

The average weekly CCS was 14.02, which was above budget.

The highest CCS sample of 17.1 was from a rake of Q240-PL in the Sextons (Pioneer) productivity district.

As always, please remember to take care as you approach cane rail crossings.

Our cane trains operate 24 hours a day, seven days a week during the season.
