## 2024-Season pricing commitments

*Concerned about meeting your pricing commitments?* QSL has a range of mechanisms available to help address overcommitment, including washing out positions or rolling pricing forward into the next season.

Growers who are worried about delivering enough sugar to satisfy their 2024-Season orders can contact their local QSL team to discuss the options available to them. Please note, that the options available to growers in non-QSL Direct regions are at the discretion of their miller.

More information about QSL's non-delivery options is available by [clicking here](#).

## Education | Sugar mix

*The latest UNICA (Brazilian Sugarcane Industry and Bioenergy Association) update reported the season-to-date sugar mix as 49.16% – but what does that mean?*

In the Brazilian sugarcane industry, the sugar mix, or sugar-ethanol mix, refers to the flexible production strategy of sugar mills. Many sugar mills in Brazil can switch between producing sugar or ethanol based on market demand, prices and government policies. So far this season, Brazil has diverted 49.16% of its cane crop to the production of sugar.
