

Just a reminder for everyone that the 2,4-D no-spray windows for SUGARCANE will likely be in effect in the Burdekin region as of **1<sup>st</sup> September until 31<sup>st</sup> October**. It should be noted that this non-use of 2,4-D will **entirely depend upon the product and rate used so please be sure to check the relevant labels** when selling/recommending/using these products over the next two months.

Please find attached a simple poster/article on this topic that helps illustrate this situation and feel free to display, forward/distribute, hand out or otherwise utilise this when dealing with your clients on this matter if it helps. As always, please feel free to contact the team with any further questions.

Best regards,
