

KALAMIA GROWER UPDATE

Friday, 29 November 2024

- We resumed crushing at Kalamia Mill this morning, following an extended stop due to a full bin derailment at the tippler station late yesterday afternoon.
- The derailment resulted in some damage to our control equipment.
- Our teams worked through the night to clear the derailed bins, assess damage and replace damaged components.
- Crushing resumed about 8.30am today.
- Our logistics team will be in contact to discuss loading requirements.

Best regards

JAMES WALLACE

Group Manager Operations (Sugar)
