Dear Grower

RE: Farm Forecast Maps - 2025

It is that time of year again when we ask growers to update their farm maps so we can make accurate crop forecasts for the next crushing season.

It is very important that the data you supply is accurate because it forms the basis of our 2025 crop forecast and affects Wilmar's overall harvest management, including your group's harvest equity. It also ensures that accurate estimate information is forwarded to your nominated GEI sugar marketer.

Your 2025 farm forecast map/s are now available on [GrowerWeb](#).

Please download your map/s from [GrowerWeb](#) and update them with plant, fallow, ratoon, variety and row width information.

Your logistics officer will get in touch to discuss your changes by the end of February 2025. However, if you are unable to talk to them, please ensure you return your updated map/s to the Burdekin CS&T team via one of the following means:

- Post: C/- Inkerman Mill, Sir Russell Drysdale Drive, Home Hill, Qld 4806
- Email: sharon.green@au.wilmar-intl.com
- In person: At any of the mill administration offices.

Estimate feedback maps, showing the changes made to your farm mapping for 2025, and a preliminary estimate will be made available in GrowerWeb in March 2025.

Thank you for your cooperation.

Yours faithfully

A handwritten signature in black ink, appearing to read "J Tait".

John Tait
Burdekin Cane Supply Manager
